2024 | 2025

Industrial

- ✓ Mulching Slashing
- ✓ Fire Mitigation
- ✓ Clear Noxious Weeds

Commercial

- ✓ Mowing
- ✓ Grounds Maintenance
- ✓ Parklands & Sports Fields

COMPANY OVERVIEW

Elktrac Pty Ltd is a leading vegetation management company servicing South East QLD, through to the Northern Rivers and New England regions in NSW.

We specialise in providing fit-for-purpose equipment and comprehensive vegetation control solutions, with our modern equipment and highly trained personnel. We also assist in reducing valuable time in maintaining all mowing and vegetation needs.

As our company grows, we are wanting to expand our operations even further in to more renewable projects and local councils, including community grounds and roadside maintenance as-well-as vegetation management in Railway corridors, expanding our workforce and upgrading our equipment, all while maintaining our commitment to providing fit-for-purpose machinery.

A fantastic job, The standard has been set very high

OUR SERVICES

Elktrac serves a wide range of clients including development and construction corporations, Government entities, industrial companies and also assist residential estates.

With over 10 years combined experience, we offer a variety of services to help clients manage their vegetation control requirements effectively and sustainably.

Industrial Vegetation Control

We invest extensive time in to our research and development, ensuring our equipment works at optimal level and meets the correct application requirements.

Commercial Vegetation Control

When it comes to your business, we make it our priority to provide versatile equipment that can handle business complexes all the way through to rural applications, ensuring clients get exactly what they require in a timely manner.

Our services not only provide efficient and professional vegetation control but also prioritises the health and sustainability of the environment.

EQUIPMENT IN USE

Elktrac utilises modern and reliable equipment, ensuring no matter what the application, it is fit-for-purpose.

Our 125hp John Deere tractor, coupled with Thrown Object Certified Muthing mulchers and mechanical fold in Gyro Head mowers, that work effortlessly around and underneath photovoltaic arrays while also aiding in rejuvenating and protecting your land.

We also pride ourselves in efficient commercial grade mowers, such as our diesel powered Grasshopper with a 1.8m mowing deck and power fold option fitted, providing safe operation in rock outcrops and ease of maintenance.

Additionally, coupled with a 1.6m Peruzzo flail mulcher for rural and open field applications.

Even our reliable Stihl small engines with versatile attachments are suited to a wide range of work and environments.

The first time we have been supplied with the right product,
for the right job

ENVIRONMENTAL BENEFITS

We are committed to delivering sustainable vegetation management solutions that minimise environmental impact. **Elktrac** operations and procedures are guided by ISO 14001 standard, ensuring that all projects are undertaken with the highest environmental practices in mind.

Waste Minimisation and Recycling

Elktrac works to reduce waste generated during mulching and mowing, recycling by-products whenever possible. Using our mulchers not only serves the purpose of reducing fuel load and providing comprehensive vegetation control, they also provide nutrients back in to the soil, further improving feed for grazing livestock.

Conservation of Natural Resources

Through our careful approach to mulching and mowing, we aim to preserve the integrity of the soil, water, and surrounding ecosystems, including ground disturbance from saturation and/or waterways.

HEALTH, SAFETY & ENVIRONMENT

At **Elktrac**, safety, quality, and environmental sustainability are at the core of everything we provide. Our comprehensive management systems, aligning with ISO standards, ensure that all work is carried out systematically and responsibly by our entire team.

Safety

We prioritise safety with strict adherence to OHS management systems, following guidelines such as AS4801 and ISO45001 standards. Our staff perform thorough risk assessments before every project and develop Safe Work Method Statements as a team.

Quality

Elktrac is committed to providing the highest quality of service, and a Quality Management System backs our operations in accordance with AS/NZS ISO9001:2008.

Environmental Sustainability

We are dedicated to minimising our ecological footprint. Our Environmental Management Plan follows ISO 14001 guidelines, ensuring sustainable procurement and waste minimisation.

OUR TEAM

Elktrac is led by General Manager Aiden Allen, who has over 5 years of experience in vegetation management and holds an Occupational First Aid Skill Set as well as Chemical Handling certification and tickets for a variety of machinery.

Our staff includes experienced operators, fitters and administration professionals, all dedicated to providing valuable knowledge and services for your tailored requirements.
